Umesh Poojary

Senior Enterprise Cloud Architect | Accelerating Digital Transformation & Secure Migrations | Azure, AWS, GCP & AI Integration | Public & Private Sectors

Katy, Texas, United States

Summary

With extensive experience in Information Technology, I am a highly accomplished Senior Cloud Architect specializing in driving digital transformation, cloud adoption, and infrastructure modernization across diverse global enterprises. My career journey has spanned various roles, including Technical Consultant, Solution Architect, Team Lead, and Manager, providing me with a holistic understanding of complex IT environments and business needs across the energy, banking, and legal sectors. I possess deep expertise in Microsoft Azure cloud services, complemented by working knowledge of AWS and Google Cloud Platform. My core strengths lie in architecting and deploying robust, secure, and scalable solutions for both cloud and on-premises environments, encompassing IaaS, PaaS, and hybrid integrations. A recognized expert in modern authentication systems, I have successfully implemented secure solutions using Azure Active Directory (Microsoft Entra ID), SAML, OAuth, and OpenID Connect protocols, often integrating with F5 APM to enhance security and access management. My proficiency extends to leading large-scale cloud migrations, where I apply strategic methodologies like the 6Rs framework and utilize tools such as Azure Migrate and Azure Site Recovery (ASR) to achieve seamless transitions with minimal downtime and significant cost savings. I am a strong proponent and practitioner of Agile and DevOps methodologies. My focus on business continuity planning, disaster recovery (DR), and high availability (HA) solutions ensures data protection and rapid recovery for critical operations. Beyond technical acumen, I am skilled in pre-sales, project management, and leading cross-functional teams, fostering collaboration and mentoring to deliver high-quality outcomes. As a Microsoft-certified professional holding multiple expert-level Azure certifications (Azure Solutions Architect Expert, Azure DevOps Engineer Expert, etc.), I am committed to staying at

the forefront of evolving technologies, delivering innovative solutions that align with business objectives and drive substantial value.

Experience

Sogeti

Sr. Manager / Sr. Cloud Architect

February 2022 - Present (4 years 7 months)

United States

Leading solution architecture and migration execution for complex cloud transformation initiatives for Fortune 500 clients in various sectors (e.g., legal, manufacturing).

Served as Squad Lead for the State of Minnesota cloud modernization initiative, leading cloud migration of workloads from on-premises infrastructure to Microsoft Azure.

Validated a VMware-to-native Azure VM migration PoC based on prior experience, accelerating migration timelines, reducing complexity, and optimizing costs.

Conducting comprehensive application assessments (500+ applications) using tools like eAPM and Movere to determine cloud readiness, dependencies, and optimal migration strategies (rehost, replatform) to Azure.

Designing and implementing advanced disaster recovery (DR) solutions leveraging Azure Site Recovery (ASR) in Azure for VMs and SQL Always On Availability Groups (AOAG) for databases, ensuring minimal downtime and strict RTO/RPO adherence.

Successfully architected and led a unique, undocumented migration from Azure AVS to native Azure VMs, achieving significant cost savings and zero incidents in record time, demonstrating innovative problem-solving.

Managed and executed strategic post-merger cloud migration projects, such as migrating Alliant's Sage ERP to Walker & Dunlop's Azure tenant under tight deadlines, ensuring business continuity without direct network connectivity.

Directed comprehensive application portfolio assessments for large enterprises (e.g., BFS Group: 1,000+ applications, 1,700+ servers), developing detailed cloud migration strategies (5Rs framework) and aligning IT rationalization with business priorities.

LTI - Larsen & Toubro Infotech

Manager - Cloud and Infrastructure Services

July 2014 - February 2022 (7 years 8 months)

Houston, TX

Consolidated multiple SSO platforms (Ping and ADFS) into EntraID to enhance security and simplify management, significantly reducing operational costs by decommissioning redundant SSO platforms and aligning with Chevron's cloud-first security strategy.

Architected and implemented modern authentication solutions by leveraging F5 APM as a reverse proxy with EntraID, configuring SAML, OpenID Connect, and OAuth protocols to provide secure, seamless access to legacy applications, enabling the adoption of modern zero trust security principles. Spearheaded large-scale cloud Migrations as part of Chevron's "Azure First" policy, migrating over 1000 VMs to Azure Cloud using Azure Site Recovery (ASR) and optimizing infrastructure for cost savings and efficiency (e.g., snapshot elimination, rightsizing, shutdown policies).

Developed capabilities for physical server migration to Azure Cloud using ASR and implemented comprehensive DR solutions, significantly reducing migration timeframes from T-180 to T-30.

Followed Agile Scrum methodology using Azure DevOps

Played a key role in the North America Data Center Migration (San Ramon, CA to San Antonio, TX), a complex, multi-year enterprise project, ensuring seamless cutovers of critical applications with zero incidents through meticulous planning and cross-functional collaboration.

Managed SAN to SAN Migration for critical SQL Database Servers to PURE Flash Array SSD, ensuring data integrity and performance.

Supported D-Hub Migration for extranet perimeter infrastructure, securing external connectivity for Chevron applications and contributing to cloud preparedness.

LTI - Larsen & Toubro Infotech

5 years 5 months

Project Manager - ICONIX Brand Group

November 2013 - March 2014 (5 months)

United States

Managed offshore teams and oversaw the implementation of key IT infrastructure, datacenter, and AWS cloud projects.

Recommended and implemented High Availability solutions for key business applications and automated workstation deployment using Microsoft Windows Deployment Service.

Implemented an Active Directory Self-Service portal to streamline user account management.

Maintained comprehensive inventory of existing IT infrastructure, datacenter assets, and AWS resources.

Manager / Solution Architect

November 2008 - November 2013 (5 years 1 month)

Powai Mumbai

Served as a key member of the System Integration business unit, responsible for preparing cost-effective and technically compliant IT infrastructure solutions for turnkey projects for central and state government entities.

Led pre-RFP activities, including sizing, Bill of Quantity (BoQ) preparation, and attending pre-bid meetings to clarify requirements.

Collaborated extensively with multiple OEMs (IBM, HP, Dell, EMC, Microsoft, Cisco, Fujitsu, Hitachi, BMC) to design comprehensive solutions.

Developed Business Continuity Plans (BCP) focusing on Disaster Recovery and High Availability for diverse applications (ERP like SAP/Oracle, Messaging, Directory Service, IP Telephony, Unified Communications, Web Portal, Database, Document Management).

Contributed to notable bids such as R-APDRP, CRIS LMS, and various State Portal and DRDO projects.

Wipro

Technical Consultant

August 2006 - November 2008 (2 years 4 months)

Mumbai

Provided comprehensive technical support for global Microsoft customers, primarily in North America, focusing on Exchange versions 5.5 through 2007. Resolved critical issues related to Exchange administration, mail flow, spam, clustering, and database recovery.

Troubleshoot and supported various Exchange components (OWA, Outlook, ActiveSync, Public Folders) and integrations with SharePoint, SQL, IIS, and BlackBerry.

Gained early exposure to Exchange Monad-based management shell (now PowerShell), demonstrating adaptability to new technologies.

Interlink Group (Acquired by EMC)

Systems Engineer (Network Engineer)

November 2005 - June 2006 (8 months)

Pune, Maharashtra, India

Supported global clients as part of the IT Infrastructure services team, focusing on network and systems monitoring using tools like BMC and HP OpenView.

Managed network monitoring (Frame Relay) and troubleshooting for CISCO Checkpoint VPN issues.

Participated in High Availability and Disaster Recovery drills.

Administered core network services including DNS, DHCP, WINS, and Active Directory operations (user management, Group Policies, OU structures).

3i Infotech Ltd.

Executive Associate

October 2004 - November 2005 (1 year 2 months)

Mumbai

Implemented Content Management Software (Interwoven Open Deploy) for the ICICI Bank Website and customized CRM product (Talisma) based on bank requirements.

Performed SQL Server administration (versions 6.5, 7.0, 2000) for various applications.

Configured and supported COTS and BESPOKE applications, troubleshooting issues with ASP, VB, and .NET applications.

Configured ODBC for database connectivity and managed VSAT x.25 based network for trading applications.

Responsible for backup and recovery of SQL Databases and application servers.

Education

MCA

Master of Computer Applications - MCA, Information Technology · (2000 - 2003)

University of Bombay

Bachelor's degree

VPM High School

Secondary School Certificate, SSC
